Subject Sykesville Oil Site FPN E043Z1 (Z3GE) [1]

I spoke to Carole Kirby this morning about this site. She had originally typed the FPN number for this site as E033Z1 in 2003, however, the error was quickly discovered and the FPN was corrected to reflect E043Z1. Carole also adjusted the site name from the Mystery Oil Site to the Sykesville Oil site. The information that appears in IFMS and in SCORPIOS is correct, the FPN number is E043Z1 and the site id is Z3GE. Please check your records in the removal program office and revise if necessary.

Thanks,  
Darlene

Darlene

I can't make changes to the FPN or site id - you will need to contact Carole Kirby in the CFMC since she issues the site id.

Subject More info on Sykesville Oil Site

Charlie,

With Jackie's help, we were able to find out additional information that may have resolved the questions as to the financial site id number for the Sykesville oil site.

The CANAPS system shows an FPN E043Z1 created for a site called "Mystery Oil Site" in Sykesville, Maryland. A request to the budget office to establish a financial site identifier listed the Mystery Oil Site in Sykesville, Maryland under an FPN E033Z1. This site was given a financial site identifier of Z3GE.

If you used the Z3GE as your account number and your work involved the Mystery Oil site alias the Sykesville oil site under the FPN E043Z1, then we solved the mystery (ha!), we'll correct the FPN error with the budget office and I'll provide you with the current inhouse site costs.

Darlene
